

# 2023

Can you identify this plant? Is it a positive or negative in a domestic grazing system? What are some other values of the plant?

If you want to learn about Montana's number one natural resource, rangeland, the answers to the above questions and many more will be discussed at the 2023 Ag Lenders Range School, June 14-16, 2023.

This year's host will be Lehfeltdt Inc., a multi-generational sheep and cattle ranch located near Lavina, MT. Selling direct to producer lamb, registered Rambouillet genetics to multiple states, and intensive grazing as well as irrigation. This ranch has a little bit of everything. Seasonally they have had H2A workers for many years and the sheep are herded through the mountains every summer. They offer internship opportunities and Ben serves as Secretary on the ASI Board.

Take this opportunity to learn the benefits to rangelands through targeted and multi-species grazing and find out the benefits of running sheep and cattle together on one of Montana's longest operational ranches.

This inexpensive learning experience (\$300 for 3 days of meals and refreshments) is filled with fun, the great outdoors and networking opportunities. Appraisers can also earn continuing education credits at the school. You will have the ability to camp with us on site or stay at a motel in town.

Send in your reservation today or contact any of the directors listed at the bottom of the page for more information.

Rex Phipps, 557-2201  
Aaron Oxarart, 442-3740  
Llane Carroll, 775-8724
