

2024

Can you identify this plant? Is it a positive or negative in a domestic grazing system? What are some other values of the plant?

If you want to learn about Montana's number one natural resource, rangeland, the answers to the above questions and many more will be discussed at the 2024 Ag Lenders Range School, June 19-21, 2024.

This year's hosts will be 2DO Ranch LLC and Harmon Creek Cattle LLC. Both are cattle operations located near Ekalaka, MT. These operations incorporate forage harvesting to feed their livestock throughout the winter. They also monitor their rangelands and operations to maintain functionality. Campers will be staying at the local Camp Needmore. This facility has 6 cabins with bunk beds. There is a latrine facility with showers and toilets. There are also RV hookups available for \$10.

Take this opportunity to learn the benefits of rangelands through cattle grazing in one of Montana's most diverse and interesting rangeland ecosystems.

This inexpensive learning experience (\$300 for 3 days of meals and refreshments) is filled with fun, the great outdoors and networking opportunities. Appraisers and realtors can also earn continuing education credits (15 credits) at the school. You will have the ability to camp with us on site or stay at a motel in town.

Send in your reservation today or contact any of the directors listed at the bottom of the page for more information.
