

# 2019

**Can you identify the most common range plants? Do you know if they are a positive or negative in a domestic grazing system? What are other valuable or detrimental plants?**

If you want to learn about Montana's number one natural resource, rangeland, the answers to the above questions and many more will be discussed at the 2019 Ag Lenders Range School, June 19-21, 2019.

This year's school will be hosted by the Rappold Ranch, located west of Dupuyer, MT along the stunning Rocky Mountain Front. Educational activities will feature ranch tours, plant ID, range site ID, details of the ranch's grazing management and much more. Along with running their own cattle, owners Karl & Terri Rappold also take in additional cattle during summer grazing while putting up irrigated and dry land hay. The ranch was founded in 1882 by Karl's grandfather. This unique area creates equally unique management challenges including Grizzly and wolf populations as well as challenges and opportunities with conservation easements. The host ranch also adjoins the Bob Marshall Wilderness and the Boone & Crockett Theodore Roosevelt Memorial Ranch.

This inexpensive learning experience (\$200 for 2 days of meals and refreshments) is filled with fun and the great outdoors. Approved for 15 continuing education credits with the state of Montana for real estate appraisers as well as ARA continuing education with the ASFMRA. You will have the ability to camp with us on site, or stay at a motel in Dupuyer, approximately 10 miles from the campsite. Additional accommodations are available in Choteau (30 miles) or Valier (30 Miles). Send in your reservation today or contact any of the directors listed at the bottom of the page for more information.

We hope to see you there!
